INDEX TO VOLUME XLI.*

A

Academy, National, Washington meeting, 521.
Alabama, geological survey, Smith, 330, 436.
  Industrial and Scientific Society, 257.
American Association of Chemists, 337.
Arkansas, geological survey, Branner, 435.
Arms, J. H., Insecta, 256.
Astronomers, list of, Lancaster, 76.
Astronomical, Washington observations for 1885, 76.
Audubon monument, 337.
Aurora, periodicity of, Verder, 156.
  problem, solution, Bigelow, 83.

B

Bailey, E. H. S., halotrichite from Pitkin Co., Colorado, 296.
Bailey, L. H., Nursery-Book, Botany, 442.
Baker, E. P., eruption of Kilauea, 443
Barker, G. F., chemical abstracts, 64, 151, 239, 323, 425, 512.
Barus, C., compressibility of hot water and solvent action on glass, 110; continuity of solid and liquid, 325.
Beecher, C. E., development of the Brachiopoda, 343.
Bibliotheca Polytechnica, 432.
Bigelow, F. H., terrestrial magnetism, 76; solution of aurora problem, 83; reply to Nipher on the theory of solar corona, 505.
Bird, C., Elementary Geology, 249.
Blake, W. P., columbite of Black Hills, South Dakota, 403.
Bloxam, C. L., Chemistry, noticed, 68.
Bonnier, G., cultures experimentales dans les Alpes et les Pyrénées, 255.
Botanical Garden, Missouri, 336.
Botany, Gray's Manual, Watson and Coulter, 441.
Botany—
  Australische Florenelement in Europa, Ettingshausen, 332.
Botany—
  Balken in den Holzelementen der Coniferen, 254.
  Corticium Oakesii and Michenera Artocreas, notes on, Peirce, 163.
  Cultures experimentales dans les Alpes et les Pyrénées, Bonnier, 255.
  Elms of Massachusetts, Dame, 254.
  European plants, index, Richter, 163.
  Fructification von Bennettites Gibsonianus, Solms-Laubach, 331.
  Hypertrophie des lenticelles chez la pomme de terre, Devaux, 442.
  Isoetes lacustris, Farmer, 334.
  Nutationskrümmungen, etc., Hansgirg, 335.
  Oaks, West American, Greene, 333.
  Protoplasmaverbindungen in der Pflanze, Kienitz-Gerloff, 518; bei Algen, Kohl, 520.
  Recherches anatomiques sur les hybrides, Brandza, 74.
  Silva of North America, Sargent, 73.
  Tribus der Gaertnereen, Solereder, 334.
Brandza, M., recherches anatomiques sur les hybrides, 74.
Branner, J. C., geological survey of Arkansas, 435.
Brigham, W. T., recent eruption of Kilauea, 507.
British Museum, catalogues of, Lydekker, 330.
Brückner's Klimaschwankungen, 141.
Bulletin of Natural History of the University of Iowa, vol. ii, 1890, 72.

C

California, State mineralogist's report, 1890, Irelan, 440.
Call, R. E., serpent from Iowa, 297.
Carus, J. V., Prodromus Faunæ Mediterraneæ, etc., 73.
Chamberlin, T. C., relationship of Pleistocene to Pre-pleistocene of Mississippi Basin, 359.
Chemiker, Handwörterbuch, Schaedler, 432.
Chemistry, Bloxam, noticed, 68.
  General Organic, Hjelt, 242.
  Inorganic, Cox, 69.

* This Index contains the general heads BOTANY, CHEMISTRY, GEOLOGY, MINERALS, OBITUARY, ROCKS, and under each the titles of Articles referring thereto are mentioned.

CHEMISTRY--
Arabinose produced from wheat bran, Steiger and Schulze, 427.
Arsenic distinguished from antimony, Denigès, 427.
Azoimide or Hydrazoic acid, Curtius, 154.
Barium, estimation of, Mar, 288.
Capillary phenomena and molecular mass, Goldstein, 64.
Carbon compounds, dispersion, Barbier and Roux, 324.
dioxide, electricity produced in preparation of, Haussknecht, 513.
Carbon produced from cyanogen, P. and L. Schützenberger, 241.
Chemical reactions, dead space in, Liebreich, 239; in jelly, speed of, Reformatsky, 425.
Chlorine, properties of liquid, Knietsch, 153.
Chromium prepared by means of magnesium, Glätzel, 153.
Compressibility of hydrogen, oxygen, nitrogen, Amagat, 512.
Cupric chloride solutions, relations of to heat, Reicher and Van Deventer, 66.
Elements, genesis of, Crookes, 429.
Heat of combustion of nitrogenous animal products, Berthelot and André, 66.
of fusion and solubility, Walker, 65.
Hydrazoic acid, Curtius and Radenhausen, 427.
Iodine in its solutions, chemical condition, Gautier and Charpy, 241.
Molecular mass by means of solid solutions, determinations of, Van't Hoff, 152; new principle of determining, Nernst, 239.
formula of hydrogen fluoride, 514.
Osmotic experiment, Nernst, 152.
pressure, Planck, 151; Boltzmann, 512.
Oxygen, extraction from air, Kassner, 514.
Silver, allotropic, Lea, 179, 259, 482; Prange, 325.
Sodium-amine, etc., Joannis, 515.
Urea from albumin, Drechsel, 154.
Vapor-densities, at low temperatures, Krause and Meyer, 323; determinations, Lunge and Neuberg, 426.
Vapor-pressures, determination, Charpy, 323.
Zinc, action on dilute sulphuric acid, Prellinger, 68.
Chemists, American Association of, 337.
Compressibility and dilatation of gases, Amagat, 155; hydrogen, etc., 512.
Conwentz, H., monographie der baltischen Bernsteinbäume, 330.
Copley medal, 258.
Cordillere von Mérida, etc., 258.
Cox, E. J., Inorganic Chemistry, 69.
Cramer, F., rock-fracture at Combined Locks Mill, Appleton, Wis., 432.
Crawford Library, Royal Observatory, Edinburgh, catalogue of, 444.
Crookes, W., genesis of the elements, 429.
Cross, W., alunite and diaspore from the Rosita Hills, Colorado, 466.
Crystalline liquids, Lehmann, 428.

D

Dame, L. L., elms and other trees of Massachusetts, 254.
Dana, J. D., Long Island Sound in the Quaternary Era, erratum, 161.
Darton, N. H., geology of the Florida phosphate deposits, 102; record of deep well at Lake Worth, Florida, 105.
Dawson, J. W., burrows and tracks of invertebrate animals, 245.
Decimal system of the seventeenth century, Gore, 22.
Deep well at Lake Worth, Florida, Darton, 105.
De Fodor, E., die Elektrischen Verbrauchsmesser, 431.
Deming, catalogue of radiant shooting stars, 75.
Derby, O. A., xenotime as an accessory element in rocks, 308; magnetite ore districts of São Paulo, Brazil, 311, 522.
Devaux, H., hypertrophie des lenticelles chez la pomme de terre, 442.
Dielectric constants, measurement of, Lecher, 242.
Dobrzynski, F., von, photographic action of electromagnetic waves, 242.
Doelter, C., Chemische Mineralogie, 441.
Dumble, E. T., geological survey of Texas, 329, 436.

E

Earth's figure by means of the pendulum, study of, Preston, 445.
Electric arc, alternating, Nichols, 1.
gyroscope, Trouvé, 156.
meters, de Fodor, 431.
Electrical properties of semi-permeable walls, Ostwald, 324.
Electrical waves, Lecher, 156; in insulating fluids, velocity, 515; in open circuit, Elsas, 156; wave lengths, Wartz, 324.
Electro-chemical Analysis, Smith, 69.
Electromagnet, Thompson, 327.
Electromagnetic waves, photographic action of, von Dobrzynski, 242.

Ethnology and Archæology, Journal of, Fewkes, 521.
Ettingshausen, Ontogenie und Phylogenie der Pflanzen, 332; fossile flora von Schönegg, 331; Australische Floren-element in Europa, 332.

F

Farmer, J. B., Isoetes lacustris, 334.
Farrington, O. C., crystallized azurite from Arizona, 300.
Ferrel, W., measures of the intensity of solar radiation, 378.
Ferrier, W. F., harmotome from Port Arthur, 161.
Fireball in Raphael's Madonna di Foligno, 235.
Flames, petroleum, illuminating power, Mayer, 52.
Fletcher, Mexican meteorites, 79.
Foam, Lord Rayleigh, 70.
Fock, A., Krystallographisch-chemische Tabellen, 258.
Foerste, A. F., Clinton oolitic iron ores, 28.
Foord, A. H., fossil cephalopoda in the British Museum, Pt. II, 438.

G

Galvanometer used with thermopile, Merritt, 417.
Gas jets under pressure, Wood, 477.
Geinitz, H. B., Lycopodiaceen aus der Steinkohlen Formation, etc., 73.
Genth, F. A., contributions to mineralogy, No. 50, 394; No. 51, 401.
Geological Society of America, 160.
Bulletin, vol. ii, 434.
Geological Surveys—
Alabama, Smith, 330, 436.
Arkansas, Branner, 435.
Illinois, vol. viii, Worthen, 159.
Kentucky, 435.
Minnesota, 1889, 246.
Missouri, Bulletin, Winslow, 248, 329; Miller, 435, 444.
New Jersey, 248.
Pennsylvania, second, 248.
Texas, first annual report, Dumble, 329, 436.
United States, ninth annual report, 1887–88, Powell, 157.
Geologie, Roth, 249.
Geologists, international congress of, 71. 257.
Geology, Elementary, Bird, 249.
Geology—
Bernsteinbäume baltische, Conwentz, 330.
Bibliography of Palæozoic Crustacea from 1698 to 1889, Vogdes, 436.
Brachiopoda, development of the, Beecher, 343.
Cambrian fossils in Vermont, Wolff, 435.
Carboniferous cockroaches, Scudder, 72.
Ceratopsidæ of North America, Marsh, 167.
Crinoids, Perisomic Plates of, Keyes, 247.
Deformation of Algonquin Beach and birth of Lake Huron, Spencer, 12.
Flora of the Great Falls Coal Field, Montana, Newberry, 191.
Florida phosph. deposits, Darton, 102.
Fossil Cephalopoda in the British Museum, Pt. II, Foord, 438.
insects of North America, Scudder, 330.
plants of the Coal measures, Williamson, 437.
Fossil Flora von Schönegg, Ettingshausen, 331.
Glacial records in the Newark system questioned, Russell, 499.
High level shores of the Great Lakes, Spencer, 201.
Horned Artiodactyle, Marsh, 81.
Invertebrate animals, burrows and tracks in Paleozoic rocks, Dawson, 245.
Iron ores, Clinton oolitic, Foerste, 28.
Lake Bonneville, Gilbert, 327.
Lake Superior stratigraphy, Van Hise, 117.
Long Island Sound in the Quaternary, Era, Erratum, 161.
Lycopodiaceen, etc., Geinitz, 73.
Marquette iron region, geology, Brooks, 160.
Pleistocene and Pre-pleistocene of Mississippi Basin, Chamberlin and Salisbury, 359.
Post-glacial history of the Hudson River Valley, Merrill, 460.
subsidence of the middle Atlantic coast, Lindenkohl, 498.
Quaternary era and deposits of flooded rivers, Upham, 33.
Raised reefs of Fernando de Noronha, Ridley, 406.
Redrock sandstone of Iowa, Keyes, 273.
Rifting in granite, Tarr, 267.

GEOLOGY—
Rock-fracture at Appleton, Wis., Cramer, 432; Reade, 409.
Saganaga syenite, Winchell, 386.
Siliceous sinter formed by vegetation of hot springs, Weed, 158.
Silurian, Lower, fish remains in, Walcott, 245.
Tertiary insects of North America, Scudder, 517.
Triceratops, restoration of, Marsh, 339.
Trilobites of Upper Carboniferous, Kansas, 517.
Volcanic rocks of Tewan Mountains, Iddings, 248.
Gilbert, G. K., Lake Bonneville, 327.
Goldschmidt, V., Index der Krystallformen, 253, 441.
Gore, J. H., decimal system of the seventeenth century, 22.
Gray's Manual of Botany, Watson and Coulter, 44.
Greene, E. L., West American Oaks, 333.

H

Hatch, F. H., Introduction to study of Petrology, 517.
Headden, W. P., columbite and tantalite from the Black Hills, 89; black rutile, 249; phosphates from the Black Hills, 415.
Heat of the moon and stars, Boys, 70.
Helmholtz medal, 521.
Hidden, W. E., polycrase of North and South Carolina, 423; mineralogical notes, 438, 439.
Hjelt, E., general organic chemistry, 242.
Hot water and its solvent action on glass, Barus, 110.
Howell E., new meteorites, 52.
Hyatt, A., Insecta, 256.

I

Ice, effects of pressure on, Wood, 30.
Iddings, J. P., volcanic rocks of Tewan Mts., N. Mexico, 248, 441.
Insecta, Hyatt and Arms, 256.
Irelan, W., State mineralogist report for California, 1890, 440.

K

Kentucky, geological survey, 435.
Keyes, C. R., Perisomic Plates of the Crinoids, 247; redrock sandstone of Marion County, Iowa, 273.
Kilauea, Hawaii, recent eruption of, Baker, 336, 443; Brigham, 507; 516.
Kountze, A. F., Alaska garnet, 332.
Krystallformen, Index, Goldschmidt, 253, 441.
Kryst.-chemische Tabellen, Fock, 255.
Kunz, G. F., diamonds in Wis., 252.

L

Lancaster, A., list of observatories and astronomers, 76.
Landero, C. F. de, Mexican grossularite, 321; Sinopsis mineralogica, 538.
Lea, M. C., allotropic silver, 179, 259, 482.
Lindenkohl, A., post-glacial subsidence of middle Atlantic coast, 489.
Lydekker, R., catalogues of the British Museum, 5.

M

Mackintosh, J. B., polycrase of North and South Carolina, 423; mineralogical notes, 438; obituary of, 444.
Magnetic screening of conducting media, Borgman, 516.
Magnetism, terrestrial, Bigelow, 76.
Mar, F. W., estimation of barium as sulphate, 288.
Marsh, O. C., Horned Artiodactyle from the Miocene, 81; gigantic Ceratopsidæ of North America, 167; restoration of Triceratops, 339.
Mathematische Abhandlungen, Schwarz, 80.
Mayer, A. M., illuminating power of flat petroleum flames, 52; physical properties of vulcanite, 54.
Mechanical equivalent of heat, Sahulka, 155.
Melting-point apparatus, Christomanos, 68.
Melville, W. H., powellite, calcium molybdate, 138; diaspore crystals, 475.
Meriden Scientific Association, 257.
Merrill, F. J. H., post-glacial history of the Hudson River valley, 460.
Merritt, E., galvanometer used with the thermopile, 417.
Meteorite, Crema, Italy, 235.
Meteorites, iron, Mexican, Fletcher, 79. new localities, Howell, 518.
Miller, S. A., geological survey of Missouri, 435.
Mineralogica, Sinopsis, Landero, 518.
Mineralogical Report, California, 440.
Mineralogie, chemische, Doelter, 441.
Minerals from Snake Hill, N. J., Perry, 73.
MINERALS—
Aguilarite, Mexico, 401. Alunite, Colorado, 466. Auerlite, 438. Aurichalcite, composition, Penfield, 106. Axinite, Mexico, 396; Franklin, N. J., 394; N. Scotia, 397. Azurite, Arizona, 300.
Bastnæsite, Colorado, 439. Bismuthinite, Mexico, 402.

MINERALS—
Calcite crystals, Pirsson, 61. Castanite, 252. Columbite, Black Hills, 89, 403.
Diamonds, Wis., 252. Diaspore, Colorado, 466, 475.
Eudialyte, Arkansas, 397.
Falkenhaynite, 252. Fayalite, Colorado, 439. Fergusonite, new localities, 440. Ferro-goslarite, Wheeler, 212. Fluorite, free fluorine in, 240.
Garnet, Alaska, Kountze, 332. Griphite, Black Hills, 415. Grossularite, Mexico, 321. Guanajuatite, 403.
Halotrichite, Colorado, 296. Harmotome, Port Arthur, Ontario, 161. Heintzite, 252. Hintzeite, Strassfurt, 252.
Magnetite, São Paulo, Brazil, 311, 522. Monticellite, Arkansas, 398.
Nickel, terrestrial, 252.
Orangite, Norway, 440.
Pinakiolite, Sweden, 251. Pollucite, composition, 213. Polycrase, N. Carolina, 423. Powellite, Melville, 138.
Rutile, Black Hills, 249.
Sulphohalite, 438.
Tantalite, Black Hills, 89. Titanite, Arkansas, 398. Trimerite, Sweden, 251. Triphylite, Black Hills, 415. Turquois, N. Mexico, 511. Tysonite, Colorado, 439.
Xenotime in rocks, 308.
Missouri Botanical Garden, 336.
geological survey, Winslow, 248, 329, 435, 444.
Morley, E. W., volumetric composition of water, 220, 276.
Müller, C., die Balken in den Holzelementen der Coniferen, 254.

N

Nebraska, University of, studies, 80.
Neurology, Journal of, 521.
Newberry, J. S., the flora of the Great Falls Coal Field, Montana, 191.
Newton, H. A., fireball in Raphael's Madonna di Foligno, 235.
Nichols, E. L., alternating electric arc between a ball and point, 1.

O

OBITUARY—
Brady, H. B., 337.
Croll, James, 258.
Hilgard, J. E., 525.
LeConte, John, 524.
Leidy, Joseph, 523.
Mackintosh, J. B., 444.
Winchell, A., 337.
Observatories, list of, Lancaster, 76.
Ocean, Indian, depths of 3000 fathoms in, 443.
Ostwald's Klassiker der exakten Wissenschaften, 253.

P

Palæontologie, Zittel, 330.
Peirce, G. J., notes on Corticium Oakesii and Michenera Artocreas, 163.
Penfield, S. L., composition of aurichalcite, 106; crystallographic notes, 394.
Perry, E. W., minerals from Snake Hill, New Jersey, 73.
Petrology, Introduction to, Hatch, 517.
Phosphate deposits of Florida, Darton, 102.
Photochronograph, Marey, 70.
Photographic sensitives, Vogel, 70.
Photographie, Geschichte, Schiendl, 430.
Photo-electricity, Minchin, 326.
Photography of colors, Lippmann, 326; pin-hole, Rayleigh, 327.
of ultra red rays, Higgs, 515.
Physics, Appleton's, 431.
Pirsson, L. V., calcite crystals from Mexico, 61; rutile from Black Hills, 250; crystallographic notes, 394.
Prange, allotropic silver, 325.
Preston, E. D., study of the earth's figure by the pendulum, 445.
Priestley's eudiometric method, Wanklyn, 428.
Pulfrich, C., total-reflectometer, 431.
